iPad Terms & Conditions (Student)

This document refers to:	The Terms and Conditions accepted by students upon receipt of their iPad from Nexus ICA.

1.1 As part of their study at Nexus ICA, undergraduate students will be provided with their own iPad.

1.2 By enrolling on the course, students accept the following terms and conditions relating to their iPad:

   i.   For students on BA(Hons) courses, the iPad becomes the property of the student at the end of their three years of study. CertHE students or students withdrawing before the end of their course are free to purchase their iPads at the end of their studies at a reduced cost. Ultimate responsibility for the device and its maintenance belongs to the student.

   ii. As part of the package, student iPads come with an insurance policy covering loss, theft and accidental damage. For insurance purposes, the device must be kept in its case at all times. If a student wishes to use a case other than the one provided, it must cover the full back of the device, all four corners and have a flip cover for the front.

   iii. Students are free to purchase any desired accessories for the device, however, these will not be paid for by Nexus ICA and the responsibility for these accessories remains with the student in question.

   iv. The Apple ID used to register the device must be the one specified by Nexus ICA during student induction.

   v.   Any apps purchased for the device are at the cost of the student. Any essential apps will be configured onto the device by Nexus ICA.

   vi. The iPad must be brought to college with the student each day. It is the responsibility of every student to ensure that their device is fully charged and ready to use every working day.

   vii. 'Find My iPad' must be configured and maintained on the device so it is operational at all times.

1.3 More information about support for the iPad program can be found in the Student Handbook.
